EDUCATION

Pennsylvania State University

Ph.D. in Statistics

2024 – Present

University Park, PA

University of Science and Technology of China (USTC)

M.S. in Statistics

2021 – 2024

Hefei, China

Nankai University

B.S. in Mathematics

2017 – 2021

Tianjin, China

RESEARCH EXPERIENCE & PUBLICATIONS

Beyond Heuristic Tuning: Power-Calibrated LLM Watermarking

2024 – 2026

Wang, X., He, Z., Liu, C., Li, R. **ICML** 2026 • first author

- Derived closed-form relationships linking logit-based watermark parameters to detection power and KL distortion, replacing heuristic tuning with a constrained optimization procedure.
- Benchmarked across GPT-2, OPT, Pythia, and Gemma-2 9B on C4, LFQA, and Wikipedia.

Marked Hawkes Processes for Recurrent Events in Electronic Health Records

2025 – Present

Wang, X., *et al.* Manuscript in preparation

- Building marked temporal point-process (deep Hawkes) models for disease risk and patient trajectories; own the cohort-construction, preprocessing, and evaluation pipelines on MIMIC-IV.

UKB-MDRMF: A Multi-Disease Risk and Multimorbidity Framework on UK Biobank

2021 – 2024

*Jiang, Y., *Zhao, B., *Wang, X., *Tang, B., *et al.* **Nature Communications** 2025 • co-first

- Built the end-to-end cleaning, feature-engineering, and survival-analysis pipeline over UK Biobank (~500K participants) for multi-disease risk prediction.
- Improved atrial fibrillation AUC by **0.05** and survival c-index by **0.15** (CVD) and **0.09** (CHD) over prior models.

Copy Number Variation Detection Based on Constraint Least Squares

2021 – 2024

Wang, X., Wang, X., Zhang, A., Wen, C. **Statistics and Its Interface** 17(1), 2024 • first author

- Designed a constrained least-squares formulation with an alternating minimization algorithm; lowest mean absolute deviation across all simulations ($\geq 25\%$ improvement) and the only method to recover every change point under heavy-tailed noise.

CATI: Medical Context-Enhanced Diagnosis Code Assignment

2021 – 2024

Shen, Y., Wang, J., ..., Wang, X., *et al.* **Artificial Intelligence in Medicine** 2025

- Contributed to a context-enhanced model that propagates information across hierarchically related diagnosis codes on UK Biobank records.

TEACHING

Teaching Assistant

2024 – Present

Pennsylvania State University, Department of Statistics

University Park, PA

- STAT 414 (Introduction to Probability Theory) and STAT 415 (Introduction to Mathematical Statistics).
- STAT 200 (Elementary Statistics): led and lectured lab sections.

TECHNICAL SKILLS

Programming: Python, R, C++, SQL

ML & Deep Learning: PyTorch, scikit-learn, XGBoost, LightGBM, CNNs, RNNs/LSTMs, Transformers, diffusion models

LLMs & NLP: LLM watermarking, fine-tuning, prompt engineering, retrieval-augmented generation, BERT, GPT-family models

Statistics & Data: Hypothesis testing, survival analysis, recurrent-event modeling, causal inference, large-scale data processing, visualization

Tools & Data: Linux/shell, Git, $\LaTeX$, Mathematica; UK Biobank, MIMIC-IV, All of Us
